

Installation Instructions

MT050A/PMT200A Check Valve Replacement

Bulletin AE01B-A0541-001

MT050A

Step 1 Remove top cover of unit by removing (10) screws on top.

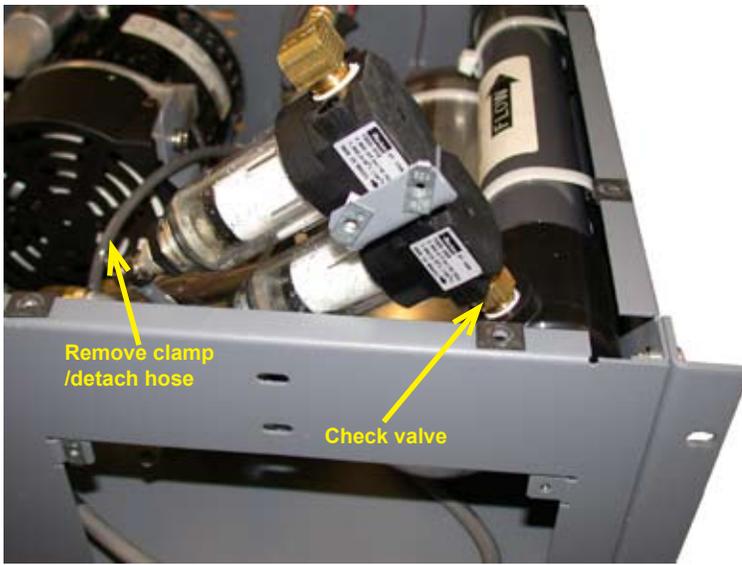

Step 2 Remove clamp from hose and detach hose from barb fitting on the filter assembly.

Loosen compression fitting (using 9/16" wrench) and detach hose from connection where shown

Step 3 Remove screws to detach filter assembly and front filter access panel from chassis.

MT050A/PMT200A CHECK VALVE REPLACEMENT

Step 4 Remove clamp from hose and detach hose from barb fitting on the bottom of filter assembly.

Rotate Filter/Dryer assembly upward, twist filter assembly loose from dryer, exposing check valve. Remove check valve from filter assembly.

Step 5 Using Teflon® tape thread sealant, thread new check valve onto filter assembly. Note **very important** orientation of check valve → on the side of the valve points away from the filter assembly when properly installed.

Step 6 Reverse steps 1-5, making sure that filter/check valve is sealed with Teflon® tape at the dryer connection.

MT050A/PMT200A CHECK VALVE REPLACEMENT

PMT200A

- Step 1 Remove top cover of unit by removing (9) screws and 2 push/pull fasteners.
