RR-FA2

Fast Access RRU Mount Kit for Back-to-Back (B2B) Mounting of (2) RRUs to Round, Straight or Tapered members

The RR-FA2 is a fast access remote radio mount bracket.
It is designed to provide a secure and efficient mounting solution for remote radio head units.

The RR-FA2 mount bracket features a revolutionary key hole located on the clamp that allows the radio and mount bracket assembly to slide perfectly into the clamp keyhole and relieves the operator from equipment weight load.

The new EZ Install design allows the brackets to be mounted to the radio prior to installation on the tower, and painlessly installed onto the tower reducing the chance of damage.

Supports all typical RRH units from Ericsson, Nokia, Samsung and Fujitsu. Ericsson radio application may also require the additional 860677769-001 interface adapter in some regions.
